

PROTEX[®]

PROTEX[®] CONTRACTOR-GRADE ROOF UNDERLAYMENT BROADCASTSM CUSTOM PRINT ADVERTISING

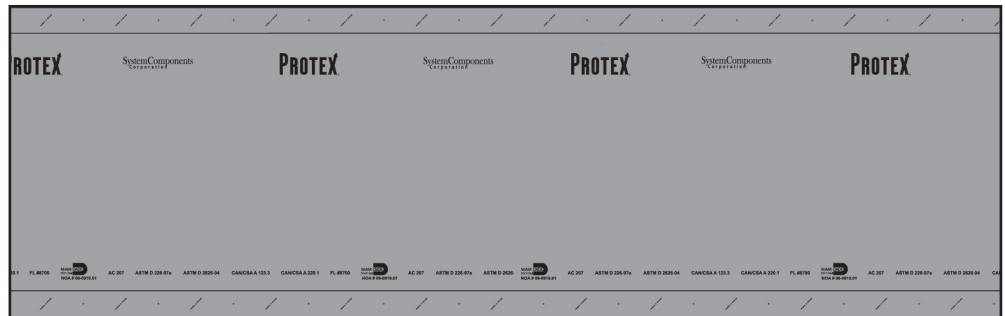

System Components has quietly revolutionized custom print advertising with ProTex roof underlayments. Our unique printing method allows very short production runs (as little as a half-pallet), full-color printing, and alternating logos and messages on the largest print area available. Custom printing your roof underlayment is easier than ever. All we need is an electronic copy of the artwork and we'll provide a layout for approval. Once approved, your order will normally ship in less than two weeks.

HOW TO ORDER BROADCAST CUSTOM PRINT ADVERTISING

Ordering custom print advertising on ProTex roof underlayments may be done in four easy steps:

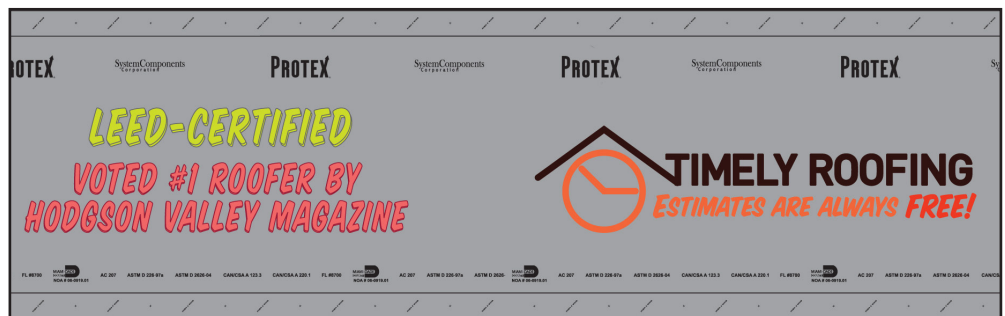

1. Determine if you want a single logo, a logo and phone number / web site, or multiple logos.
2. Submit artwork to System Components, preferably electronically in vectored form (.eps, .ai).
3. Approve the returned artwork proof and place your order.

Standard ProTex print

BROADCAST printing in lane #2 with alternating logo and message.

BROADCAST printing is available in all three lanes at a higher minimum print quantity.

We offer the industry's lowest minimum for custom-printed roof underlayments - at only 18 per pallet, in a length of either 100' or 250'.
